DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3, 6, 7, 10-13, 15, 16, 18, 19, 21, 22, and 24-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Neil et al. (US Pat. No. 6,306,172) in view of Keller (US Pub. No. 2004/0186584). O'Neil discloses the following of claims 1, 15, 16: a tibia base plate (78) comprising an upper surface, a lower surface and an outer perimeter side surface (see Figures 5-6A) extending between said upper surface and said lower surface of said tibia base plate; an insert (66) comprising an upper surface (67), a lower surface and an outer perimeter side surface extending between said upper surface and said lower surface of said insert (see Figures 5-6A); and a configuration that allows rotation and a pin that when inserted prevents rotation (col. 5, lines 21-35). However, regarding claims 1, 7, 10, 15, 21, 24, O'Neil does not disclose the pin being located in outer perimeter side surface. Keller discloses a pin in this location in paragraph 0007 and claim 6 for the purpose of allowing easier instrument accessibility to the pin's location. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to place the pin in the outer perimeter side surface in order to allow an instrument to more easily access the pin.

O'Neil et al. discloses claims 2 and 18 in col. 1, lines 16-21.

O'Neil et al. discloses claims 3 and 19 in col. 1, lines 31-34.

Application/Control Number: 10/771,887

Art Unit: 3774

O'Neil et al. discloses claims 6 and 22 in col. 5, lines 30-35.

O'Neil et al. discloses claims 11 and 25 as shown in Figure 5-6A.

O'Neil et al. discloses claims 12 and 26 in element 74.

O'Neil et al. discloses claims 13 and 27 in element 72.

Claims 14 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Neil et al. in view of Keller in further view of Hurlburt (US Pat. No. 5,658,344). O'Neil et al. and Keller disclose the invention substantially as claimed, however, they do not disclose a pin made of metal. Hurlburt teaches a pin made of metal in col. 6, lines 27-39 for the purpose of utilizing the material's strength. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the pin of metal in order to utilize the material's strength.

Response to Arguments

Applicant's arguments with respect to claims 1-3, 6, 7, 10-16, 18, 19, 21, 22, and 24-28 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Application/Control Number: 10/771,887

Art Unit: 3774

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this

final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ann Schillinger whose telephone number is (571) 272-6652. The examiner can normally be reached on Mon. thru Fri. 9 a.m. to 4 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (571) 272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
